

**George S. Braucht**

(pronounced like “what” except begin with “br” instead of a “wh”)

George Braucht applies a recovery-oriented, person-directed and outcome-informed approach to promoting personal and community well-being. His engaging training style and science-rich content have garnered excellent ratings in academic and applied settings, e.g., Franklin University; Kennesaw State University; DeVry Institute of Technology; and crisis, mental health, substance abuse, employee assistance, and criminal justice programs. Mr. Braucht’s three-decade career has included direct services, clinical supervision, program development, management, research, quality improvement, and training. He enjoys working with professional, para-professional, faith-based, and volunteer service providers. George currently manages the residential facility review and development process for the Georgia (USA) Parole Board’s Transitional Housing for Offender Reentry Directory, which he started in 1995, and he assists with program development, clinical supervision and training in the Board’s Personal Recovery and Offender Discharge Services program. He is the Principal Collaborator with Braughtworks Consultation and Training. Formerly a Licensed Professional Clinical Counselor in Ohio and a Mental Health Professional in Georgia, he is a Georgia Licensed Professional Counselor, a Certified Client-Directed, Outcome-Informed Services Trainer with the Heart and Soul of Change Project, a Certified Recovery Coach Academy Trainer by the Connecticut Community for Addiction Recovery, a Certified Community Crisis Responder by the National Organization for Victim Assistance, a FAVOR-certified Science of Addiction and Recovery (SOAR) Trainer, and a Certified Instructor by the Georgia Peace Officers Standards and Training Council. In addition, George serves on the Editorial Board of *Corrections Compendium*, the American Correctional Association’s peer-reviewed research journal, and has numerous publications in psychology and criminal justice. His Master of Science degree in general experimental psychology is from Georgia College with concentrations in physiological, clinical, and community psychology.
